## **NIST Risk Management Framework** a brief primer based on NIST Special Publication 800-37

HIST SPECIAL PUBLIC CATEGORIZE PREPARE NIST MPLEMEN; ONITOR **RISK MANAGEMENT FRAMEWORK** CLE APPROACH SSISS nist.gov/rmf MANAGEMENT FRAM 35IROHTUA Presented by: Cybersecurity & Information Systems Jeremy Licata (NIST) Information Analysis Center (CSIAC) NIST Risk Management Framework (RMF) Team Computer Security Division (CSD)

DISCLAIMER: any mention of entities, equipment, materials, or services throughout this talk is for information only; it does not imply recommendation or endorsement by NIST, nor is it intended to imply best available solution for any given purpose.

Briefing for:

July 12, 2023 (Virtual)

# Agenda

### What is the Risk Management Framework?

Who is using the RMF and why?

What happens in each step of the RMF?

The RMF provides a *structured, yet flexible process,* for managing *cybersecurity and privacy risk:* 

- Multi-step, outcome-focused methodology;
- Created to help federal agencies meet Federal Information Security Modernization Act (FISMA) requirements for managing security and privacy risks;
- Required for federal agencies (can be adopted by non-federal entities including domestic and international organizations on a voluntary basis) → Not a compliance checklist;
- Integrates information security and risk management activities into the system development life cycle.

# Using the RMF

#### Framework enables risk management processes for any organization

Supports efforts to frame cybersecurity and privacy risks within the organization, at the mission/business level, and at the operational system level to provide consistent outcomes

### **RMF** Steps

#### **ORGANIZATIONAL AND SYSTEM PREPARATION (TO EXECUTE THE RMF)**

Essential activities to **prepare** the organization to manage security and privacy risks

#### SYSTEM CATEGORIZATION

**Categorize** the system and information processed, stored, and transmitted based on an impact analysis

#### **CONTROL SELECTION**

Select the set of NIST SP 800-53 controls to protect the system based on risk assessment(s)

#### **CONTROL IMPLEMENTATION**

Implement the controls and document how controls are deployed

#### **CONTROL ASSESSMENT**

Assess to determine if the controls are in place, operating as intended, and producing the desired results

#### SYSTEM AUTHORIZATION

Senior official makes a risk-based decision to authorize the system (to operate)

#### SYSTEM/CONTROL MONITORING

Continuously monitor control implementation and risks to the system

## Task Structure

<b>Task</b> abbreviation	AUTHORIZATION BOUNDARY  TASK P-11 Determine the authorization boundary of the system.	Information that <b>may</b> be needed to complete the task

### **RMF** Prepare Step

#### **Purpose**

Carry out essential activities at all three risk management levels to help prepare the organization to manage its security and privacy risks using the RMF.

#### Organization & Mission/Business Process Level Tasks

- P-1: Risk Management Roles
- P-2: Risk Management Strategy
- P-3: Risk Assessment Organization
- P-4: Organizationally-tailored Control Baselines and Cybersecurity Framework Profiles (optional)
- P-5: Common Control Identification
- P-6: Impact Level Prioritization (optional)
- P-7: Continuous Monitoring Strategy Organization
- P-8: Mission or Business Focus

#### System Level Tasks

P-9: System Stakeholders
P-10: Asset Identification
P-11: Authorization Boundary
P-12: Information Types
P-13: Information Life Cycle
P-14: Risk Assessment – System
P-15: Requirements Definition
P-16: Enterprise Architecture
P-17: Requirements Allocation
P-18: System Registration

### **RMF** Categorize Step

#### Purpose

inform organizational risk management processes and tasks by determining the adverse impact of the loss of confidentiality, integrity, and availability of organizational systems and information to the organization.

- C-1: System Description
- C-2: Security Categorization
- C-3: Security Categorization Review and Approval

### **RMF Select Step**

#### Purpose

select, tailor, and document the controls necessary to protect the information system and organization commensurate with risk to organizational operations and assets, individuals, and the Nation.

- S-1: Control Selection
- S-2: Control Tailoring
- S-3: Control Allocation
- S-4: Documentation of Planned Control Implementations
- S-5: Continuous Monitoring Strategy System
- S-6: Plan Review and Approval

## **RMF Implement Step**

#### Purpose

Implement the controls as specified in security and privacy plans for the system and for the organization, and update the plans with the as-implemented details.

- I-1: Control Implementation
- I-2: Update Control Implementation Information

### **RMF** Assess Step

#### Purpose

Determine if the controls selected for implementation are implemented correctly, operating as intended, and producing the desired outcome with respect to meeting the security and privacy requirements for the system and organization.

- A-1: Assessor Selection
- A-2: Assessment Plan
- A-3: Control Assessments
- A-4: Assessment Report
- A-5: Remediation Actions
- A-6: Plan of Action and Milestones

### **RMF** Authorize Step

#### Purpose

Provide accountability by requiring a senior management official to determine if the security and privacy risk to organizational operations and assets, individuals, other organizations, or the Nation based on the operation of a system or the use of common controls, is acceptable.

- R-1: Authorization Package
- R-2: Risk Analysis and Determination
- R-3: Risk Response
- **R-4:** Authorization Decision
- **R-5:** Authorization Reporting

### **RMF Monitor Step**

### NST

#### Purpose

Maintain an ongoing situational awareness about the security and privacy posture of the system and the organization in support of risk management decisions.

M-1: System and Environment Changes
M-2: Ongoing Assessments
M-3: Ongoing Risk Response
M-4: Authorization Package Updates
M-5: Security and Privacy Reporting
M-6: Ongoing Authorization
M-7: System Disposal
